

Phys 194–FYRE PS 1

Given: Sep 6, 2017. Due: Sep 13, 2017

Homework Policy: You can consult class notes and books. Always try to solve the problems yourself; if you cannot make progress after some effort, you can discuss with your classmates or ask the instructor. However, you cannot copy other's work: what you turn in must be your own. Make sure you are clear about the process you use to solve the problems: partial credit will be awarded.

Problem 1 Learning Python

Go to <https://groklearning.com>. Spend 4 hours working on learning python. Send an email to astro-fyre-instruct@uwm.edu when done with the units that you have completed.

Problem 2 Famous Astronomers

Prepare a single slide (powerpoint or similar) on your favorite astronomer. This can be a historical figure or somebody currently doing research. Be prepared to give a 5 min presentation to the class on your choice. Come to class either with your slide on a memory stick, your own laptop, or email it to astro-fyre-instruct@uwm.edu.
