

# Astronomy 104: Astronomy Laboratory GER Evaluation

Spring 2018

Date:

Grading Criterion	Useful (2)	Mildly Useful (1)	Not Useful (0)	Score
Purpose of lab	The purpose of the lab was clear: I understood the problem we were trying to solve. The lab enhanced the material we did in class.	The purpose of the lab was somewhat clear: I basically understood the problem we were trying to solve. The lab was loosely relevant to the concepts we discuss in class.	No idea what the purpose of the lab was: the lab seemed unconnected to concepts we discuss in class.	
Data Collection	I enjoyed collecting the data; I had enough direction.	I understood mostly how we collected the data: I could have used more direction.	I didn't understand how we collected the data: I needed more	
Methods	I understood the reasons we collected the data the way we did: I could see the parameters we were isolating and how we were testing our idea(s).	I understood mostly why we collected the data we did, but I am not sure what parameters we were isolating.	I didn't understand why we collected the data we did.	
Understanding	The lab helped my understanding of the relevant problem/ concept significantly.	The lab helped my understanding of relevant problem/ concepts to some extent.	The lab did not help me understand any concepts.	
Misconceptions	The lab helped me identify and explain misconceptions I had.	The lab helped me identify misconceptions I had, but I am not sure I understand fully.	It didn't give me any insights in my understanding of the problem.
